

Indira Gandhi Government PG College, Vaishali Nagar
Department of Botany
Best Practice (2023-2024)

Implementing best practice in Botany department focuses on skill development in students. Plant Nursery preparation technique is a vital skill that offers immense potential for career opportunities, entrepreneurship, and community development. Learning plant nursery techniques equips individuals with practical skills and knowledge for propagating, cultivating, and managing plants for commercial, ornamental, and environmental purposes. With this aim a small workshop was organized to help students learn plant nursery preparation techniques. The plant saplings prepared by the students were displayed for sale in the Anand Mela organized by the college. The profits were reinvested in purchasing additional plants to enhance the botanical garden.
